ABOUT ME

I am a web developer that creates beautiful, responsive and performant web apps.

The WEB stack, Wordpress and React are where I'm the most comfortable. But I'm always excited to learn new technologies.

If I ever get stuck and can't find solutions to my programming problems, I lose sleep and I never stop until I fix them, I just love challenges.

Skills

- HTML5 / CSS3 / JavaScript
- SEO / Responsive web design
- Wordpress / Sass / Bootstrap 4
- React / Material-UI / React Context API
- Version Control Git/ GitHub
- ES5/ESNEXT / Node.js
- Webpack/ Gulp / Yarn / Babel
- AJAX/ RESTful API

Languages

- English
- French C1

Experience

GREENRECIPES: *React/Hooks/MATERIAL-UI/Public REST API*

React crud web app that allows adding, saving and deleting lists of foods based on the macronutrients they provide.

The app takes then a food combination from the saved food list as a search query, and sends a get request to a public Recipe Search API.

The app also features adding details to recipes (eg: Peanut-Free, Sugar-Free, Alcohol-Free) in a placeholder.

All the recipes are filtered and 100% vegan.

Web portfolio: *Bootstrap4/Gulp/Sass/Netlify/Google Analytics*

Web landing page using CSS frameworks and Netlify contact form.

It also uses Google Analytics and Google Tag Manager to track visitor clicking behaviours in order to continuously improve the website.
